Projects

E-Commerce Website (Full-Stack)

[GitHub](#) [Website](#)

NodeJs, ExpressJS, MangoDb, Mangoose, JWT, REST API, EJS, Postman, HTML, CSS, JavaScript

- Lead a team of 3: organized meetings, delegated tasks, helped teammates debug, etc.

- Built a **REST API** to implement sign-up and login to allow customers to save payment methods and track their orders.

- Used **JWT** for token to store user sessions on client site

- Added admin panel to track inventory, update or delete inventory, track orders, etc.

- Designed the UI/UX, implemented the front end with a robust back end using a view engine.

- Used **Github** for version and control and **Heroku** for hosting.

Crypto Tracker (Front end)

[GitHub](#) [Website](#)

ReactJS, Redux Toolkit, Styled Components, NodeJs, REST API, Google Cloud Firebase Storage & Realtime DB

- Used **CoinGecko** to access real-time and historical price changes for over 10k cryptocurrencies.

- Used **ReactJs** to design the front end and **Redux Toolkit** to track changes in states.

- Used **NodeJs** to implement recent news articles from **NEWSAPI** regarding the selected cryptocurrency.

- Used **GraphJS** to graph the changes in the cryptocurrency.

- Implemented both dark and light themes.
